Interface Uganda,  
Trustee Board,  
UK

Dear Sir/Madam,

Re: Dr Mohamed Abdelrahman – applicant for Interface Uganda Fund

I am delighted to provide a reference for Dr Mohamed Abdelrahman. I have known Dr Abdelrahman since he commenced MD studies in General Surgery within Sudan Medical Council. Despite having dual responsibilities Mohamed rapidly settled into his studies and proved to be a highly focused and industrious candidate. He passed all in-programme assessments with high marks (80%+) and passed all 5 sections of the final examination, achieving marks of 65%-80%. He is undoubtedly one of the most academically motivated and talented surgeons that I have taught over the past 20 years.

During His MD he undertook a detailed review of *use of technology in Surgical Education*. This work was so well presented that it was eventually published as an extensive review in one of the leading journals in the field in our country. In view of the wide range of scientific subjects that were covered within this review it was evident that he was capable of interpreting data in a rapid and appropriate manner.

Following completion of his MD Mohamed's ambition led him to pursue a fellowship in Medical Education, where he helped us alot in our Accreditation work at the Council. He also kept on treating his patients with passion, and developed a high sense of research as well. As part of this he has set up a series of studies to examine aspects congenital diseases –Hypospadias and clefts- in Sudan, it is likely that a series of important works will emerge from this as there is a dearth of data concerning the vulnerable population of the children with congenital health needs, which will have a good impact on this population. His establishment of these studies clearly indicate that Dr Mohamed has the leadership skills and motivation to undertake clinically-relevant research.

He is a class A surgeon and quite trainable, with a very pleasant manners, honest, dedicated, hard and team worker, that's why we have supported him much in his application for your training fund, so as to provide this new service – Plastic and Reconstructive surgery - to our country, and he is capable to train others because of his scholarly attributes.

I wholeheartedly support the application of Dr Mohamed to your Fund. He has immense potential that will benefit surgery and health care within Sudan, and worldwide. And he has our full support.

Yours sincerely,

Prof Ahmed Gasim Fadl, MD,FRCS,FAME  
Professor of Surgery,  
Head of the Advisory Board of Surgery,
